Steel plate news

Lead times remain elevated at approximately eight to 12 weeks.

US domestic plate prices remain stable in tight market

By Melissa VanDervort - Tuesday 01 September

US steel plate prices were steady on Tuesday September 1, with market participants describing a strong demand environment, with mill maintenance shutdowns contributing to spot supply scarcity and dwindling stock levels in the domestic market.

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$74 per hundredweight (\$1,480 per short ton) on Tuesday September 1, steady week on week since going up by 1.37%, or by \$1.00 per cwt, from \$73 per cwt on August 11.

Inputs were collected in a range of \$67.50-75.00 per cwt, representing offers and indications of the general spot market.

Spot material remains in short supply in the domestic plate market amid thinning inventory levels and continually robust demand, sources said.

"Overall, all is good, demand is great," a distributor said. "Steel is good business right now."

A second distributor had a similar view, saying, "Supply will crimp in October but should come back some in November, [but] regardless supply for the balance of 2026 will be tight."

Current and upcoming power outages at plate mills will further strain supply and affect production, which may drive up plate prices in the near term, according to market participants.

"The market remains strong. The shutdowns will certainly lead to further shortages while extending lead times [at the mills]," a third distributor said. "We expect this to continue for some time."
