Steel plate news

US domestic steel plate prices steady in robust market

By Melissa VanDervort - Tuesday 02 June

US steel plate prices were stable on Tuesday June 2, with most market participants describing solid demand and spot activity in the week to Tuesday June 2 amid low inventory levels and a tightening supply chain for domestic plate.

Fastmarkets' weekly price assessment for steel cut-to-length plate, carbon grade, fob mill US, was \$67 per hundredweight (\$1,340 per short ton) on Tuesday, flat from May 26 but up by \$1.00 per cwt, 1.52%, from \$66 per cwt on May 19.

Domestic plate demand remained strong, particularly in shipbuilding, military, data centers and infrastructure industries, according to a distributor.

"Data centers, shipbuilding, military, bridges [are] all pretty strong right now," the distributor said.

Market participants said that plate supply was tightening, with multiple mills expected to be taking downtime for planned outages throughout the summer

and into the autumn, further straining dwindling buyer inventories, and potentially contributing to higher spot prices over the summer and autumn months.

"Plate supply will get tighter [in] the third quarter heading into the fourth quarter," the distributor said. "JSW is upgrading its mill in August, September and part of October; SSAB Montpelier is going down in September for maintenance; and Nucor Hertford is going down for two weeks in September. With mills on allocation, things will get very tight."

A second distributor shared a similar view. "Demand remains strong and supply [is] constrained," he said. "I expect plate price increases to be announced in the near future. At the moment, customers are digesting fuel surcharges and other freight cost increases.

"In the meantime, it genuinely looks like plate demand is increasing," the second distributor added. "Some of that is due to organic growth in industries that require plate. Some of the increased demand is also due to derivative tariffs pulling more production back to the US."

A third distributor agreed with that, saying: "Material is very tight [right now]. [Demand] is not projected or even [likely] to get slower under this [political] administration. Life is good in the US steel business."

Lead times ranged from six to eight weeks, according to trade sources.

Rebar news

Turkish steel mills focus on finished steel sales amid inactivity in scrap imports

By Cem Turken - Tuesday 02 June

Turkish steel mills have maintained their focus on finished steel sales and remained inactive in the deep-sea steel scrap import markets, trade sources told Fastmarkets on Tuesday June 2.

The steelmakers in the country have been staying away from scrap imports since the most recent cargo deal heard on May 21. A steel mill in the Iskenderun region booked a UK cargo of HMS 1&2 (80:20) at \$406 per tonne CFR.

Amid the lack of fresh trading, the daily scrap indices were unchanged on Tuesday.

Fastmarkets' daily index for **steel scrap, HMS 1&2 (80:20 mix), North Europe origin, cfr Turkey**, was calculated at \$402.34 per tonne on Tuesday, unchanged day on day.

The corresponding index for **steel scrap, HMS 1&2 (80:20 mix), US origin, cfr Turkey**, was calculated at \$410.02 per tonne on June 2, also stable day on day.

This left the premium for US scrap over European material at \$7.68 per tonne on the day.

The Turkish steelmakers have been trying to maintain their rebar offers to attract customers.

A major steelmaker in the Marmara region lowered its rebar offer by \$5 per tonne to \$595 (27,326 Turkish lira) per tonne ex-works, excluding 20% value-added tax (VAT). This would be roughly 32,790 lira per tonne after the local sales tax.

Steel mills in the Iskenderun region were offering rebar at \$590 per tonne, while the mills in Izmir were offering at \$590-600 per tonne ex-works, excluding VAT.

Istanbul mills were offering similar material at \$603-620 per tonne ex-works.

Fastmarkets' weekly price assessment for **steel reinforcing bar (rebar), domestic, exw Turkey**, was 32,000-33,000 lira per tonne on May 28, unchanged week on week.

Market sources believed that Turkish steel mills will need more scrap for July shipments but wanted to secure some finished steel sales before making raw material purchases, Fastmarkets was told.

Steel slab news

Asia slab prices stable amid limited demand

By Zihuan Pan - Tuesday 02 June

Asian slab prices held steady in the week to Tuesday June 2, with trading remaining poor due to weak demand, sources told Fastmarkets.

Demand for semi-finished or finished steel has weakened across Asia in recent weeks, which has put downward pressure on prices, according to sources.

Fastmarkets' weekly price assessment for [steel slab import, cfr Southeast Asia/East Asia](#) was \$510-535 per tonne on Tuesday June 2, unchanged from Monday May 25.

Deals for China-origin slab were heard at \$510-515 per tonne CFR East Asia in the week to May 29, while the Southeast Asian import marker was quiet, sources said.

On an FOB basis, slab offers from Chinese mills were said to be steady at \$490-495 per tonne, while a major Indonesian mill cut its base price for August-shipment slab to \$515 per tonne on Tuesday, down from \$525 per tonne a week earlier due to poor demand.

Greater slab availability

The number of offers or indications for slab – the flat, semi-finished product used to produce hot-rolled coil, which is then further processed into cold-rolled coil (CRC), coated products and steel plate – has increased over the past week, with reduced demand for finished steel products driving more and more mills to try and sell slab, sources said.

Chinese plate producers were offering slab at \$525-535 per tonne CFR East Asia, while a Vietnamese blast furnace steelmaker indicated that it had slab available, having prioritizing HRC production for the past few months.

Fastmarkets' calculation of its [steel hot-rolled coil index export, fob main port China](#) came in at \$505.76 per tonne on June 1, down from \$518.92 per tonne on May 12, which was a high not seen since October 2024.

Fastmarkets' weekly price assessment for [steel HRC, import, cfr Vietnam](#), which mainly looks at 2-3 mm re-rolling-grade SAE1006 HRC and equivalent products, was \$565-570 per tonne on Friday, down by \$10-13 per tonne from \$575-583 per tonne on May 22, marking the third straight weekly decline.

Increased supplies, [weak demand](#), and market uncertainty kept Asian slab buyers on the sidelines, sources told Fastmarkets.

"We will be in wait-and-see mode for a while, before the market shows a direction," a buyer said.

Weak demand is weighing on prices for slab and finished steel, but increased energy costs [amid the prolonged Middle East conflict](#) and [intensified safety checks across coal mines in China after a fatal explosion](#), are acting as support for steel prices, according to sources.
