urbanization in emerging markets is locking steel into long-life construction, limiting the supply of high-quality recyclable scrap needed to sustain growth in electric-arc furnace steelmaking, Macedo added.

Energy, data and design critical for survival

Long-term survival in the ferroalloys sector will depend on three core pillars: secure clean energy, audited emissions data and optimized alloy design, Macedo said.

Producers will need to accelerate the transition toward hydroelectric, solar or hybrid power systems, while traders and suppliers must provide transparent, plant-specific Scope 3 emissions data to maintain access to premium European and Asian markets, Macedo said.

Macedo added that there are expectations among market participants for steelmakers to use noble alloys and micro-alloying techniques to maximize strength while minimizing material volumes and embedded carbon.

Steel plate news

US domestic steel plate prices rise sharply following mill price increases

By Melissa VanDervort - Tuesday 07 April

Plate prices in the US jumped up on Tuesday April 7 after price increases were announced by steelmakers Nucor and SSAB Americas on Monday April 6, with market participants describing a continued robust demand environment in the domestic market.

Fastmarkets' weekly assessment for steel cut-to-length plate carbon grade, fob mill US was \$62 per hundredweight (\$1,240 per short ton) on Tuesday, up by 3.33%, or \$2.00 per cwt, from \$60 per cwt on March 31.

Inputs were collected in a range of \$60-65 per cwt, representing deals, offers and assessments of the general spot market.

Demand in the domestic plate market continued to be robust at the start of the second quarter of the year, particularly with contract and project tons, according to a plate distributor.

"Our demand has been flat overall, but we are hearing project business is very strong for the mills," the distributor said. "We still think [plate prices] have room to go to the \$65.00 [per] cwt area within the next month."

A second distributor shared a comparable view, saying, "[It is the] same demand story on our end. Day-to-day demand is average, while projects and contracts are strong. [The] biggest challenge for service centers today is that everyone is all over the place with pricing."

Steelmakers Nucor and SSAB Americas raised plate prices by \$60 per ton (\$3 per cwt) in respective letters to customers on April 6 — their second hike in less than a month — an upward price move that sources expect to be accepted by the market amid a strong demand environment.

<https://dashboard.fastmarkets.com/a/5252349>

In addition to the price increase, the Nucor letter announced that they are planning to enforce a new fuel surcharge fee to combat rising fuel and delivery costs.

“To address increased costs in fuel and logistics, the Nucor Plate Group will be implementing a fuel surcharge (FSC) on all shipments effective May 1, 2026.

Each month's FSC will be announced on the 15th day of the prior month. This FSC will be updated monthly to reflect real freight cost changes in the market,” the letter stated.

Domestic plate prices have risen astronomically since the close of 2025, jumping by 19.23%, or \$10 per cwt, from \$52 per cwt on December 30 2025.

“Our demand is higher than it has been since April of 2025 [and] lead times are well out from the big mills,” a plate consumer said. “I would expect prices to continue escalating from the next several weeks, reaching \$70 [per] cwt sometime in May.”

Lead times are at eight weeks, according to sources.

Rebar news

China's domestic rebar prices stable on replenishment demand

By Jessica Zong - Tuesday 07 April

China's domestic rebar prices were stable on Tuesday April 7, supported by post-holiday restocking demand but capped by persistently high spot market inventories, sources said.

Buyers raised the procurement of rebar after the Qingming Festival holiday from April 4-6 to replenish depleted inventories. Several traders reported higher sales volumes compared with levels seen ahead of the holiday.

Market participants remained confident about end-user demand for rebar in April, which is traditionally the seasonal peak month for construction activity, as weather conditions are generally favorable, sources said.

However, elevated spot market inventories, particularly in Hangzhou and Shanghai, continued to exert downward pressure on prices. A trader based in Hangzhou said rebar stocks in the city remained above 1.5 million tonnes.

According to sources, steel mills maintained elevated production rates for

rebar due to positive profit margins, which could put additional downward pressure on rebar prices.

Fastmarkets' daily price assessment for steel reinforcing bar (rebar) domestic, ex-whs Eastern China was at 3,080-3,100 yuan (\$449-452) per tonne on Tuesday, unchanged from April 3.

Market Chatter

"So far, buyers have not been very eager to sell rebar cargoes, largely due to optimism over near-term demand prospects. The expectations of stronger construction activity in April, coupled with the recent post-holiday restocking, have encouraged sellers to adopt a wait-and-see approach. As a result, many sellers prefer to hold material rather than offer aggressively, opting to wait for clearer price direction and signs of sustained demand before adjusting their sales strategies," a trader based in Shanghai said.

Billet

Fastmarkets' daily price assessment for steel billet domestic, exw Tangshan, Northern China was 2,980 yuan per tonne including value-added tax on Tuesday, unchanged from Friday.

Shanghai Futures Exchange

The most-traded October rebar futures contract on the Shanghai Futures Exchange closed at 3,115 yuan per tonne on Tuesday, down by 9 yuan per tonne from the closing price of 3,124 yuan per tonne on Friday.
