Cold-rolled coil news

US CRC, HDG prices continue climbing on limited spot availability

By Alesha Alkaff - Thursday 09 July

Cold-rolled coil and hot-dipped galvanized steel prices in the US rose during the assessment period ended Thursday July 9, with sources reporting tight supply and healthy demand.

Fastmarkets' weekly price assessment for **steel cold-rolled coil, fob mill US** increased to \$68 per hundredweight (\$1,360 per short ton) on Thursday, up by \$0.50 per cwt, or 0.74%, from the previous assessment of \$67.50 per cwt on July 2.

Inputs were collected in the range of \$67.50-69.00 per cwt, representing general indications of the spot market.

The US cold-rolled steel market was quiet during the week ended Thursday, with some buyers avoiding the spot market during the Independence Day holiday on Saturday July 4.

"I have had no issues with buying on the maximum side of my contracts. I am not buying anything on the spot market right now. Basically, if a supplier has material, you are at their mercy with pricing," a distributor said.

More broadly, the continued upward trajectory of CRC prices has prompted some market participants to question how much longer the increases can continue.

While some mills have caught up and are meeting orders on time, others are still struggling, sources said, extending lead times.

Fundamentally, supply remains limited, with buyers sticking to contract commitments and purchasing only as needed.

Some sources expect prices to soften in the near term as imports arrive.

Fastmarkets' weekly price assessment for **steel hot-dipped galvanized coil (cold-rolled base), fob mill US** increased to \$68.25 per cwt (\$1,365 per ton) on Thursday, up by \$0.50 per cwt, or 0.74%, from the previous assessment of \$67.75 per cwt on July 2.

Inputs were collected in the range of \$67.75-73.00 per cwt, representing general indications of the spot market.

Meanwhile, Fastmarkets' weekly assessment for **steel hot-dipped galvanized coil (hot-rolled base), fob mill US** increased to \$67.25 per cwt on Thursday from \$66.75 per cwt in the previous assessment.

Prices for hot-dipped galvanized steel increased during the assessment period ended Thursday, with sources reporting limited supply and strong demand, factors sources expect to continue in the near term.

"We are still seeing very limited availability [for HDG]. The majority of our mill partners are currently not quoting spot at all," a second distributor told Fastmarkets. "Demand for us is still very strong, we have not seen any slowdown in momentum since things picked up in April. We are anticipating at least two to three more months of this type of demand."

Some buyers are struggling to secure spot material because some mills are not currently quoting for spot orders, sources said, adding that lead times for spot material extend as far out as early October.

Additionally, surging demand from data centers is a major factor limiting HDG spot supply, sources said.

"Galvanized availability has been extremely tight with data center demand chewing up mini mill availability, so I could see those prices heading up," a buyer said.

Lead times for coated steel are estimated to be around eight to ten weeks.

Rebar news

Turkish long steel prices weaken on falling scrap cost, poor demand

By Cem Turken - Thursday 09 July

Turkish long steel prices moved lower in the week to Thursday July 9, with falling scrap prices, weak global markets, seasonal summer slowdowns and domestic political and economic uncertainty continuing to weigh on sentiment, trade sources told Fastmarkets.

Turkish mills reduced their rebar offer prices to export markets to \$550-560 per tonne FOB on an actual weight basis, from \$560-570 per tonne FOB the previous week, with workable prices heard around \$550 per tonne FOB, industry sources said.

Fastmarkets' weekly price assessment for **steel reinforcing bar (rebar), export, fob main port Turkey**, was \$550-560 per tonne on Thursday, down from \$560-570 per tonne the previous week.

The weekly price assessment for **steel wire rod (mesh quality), export, fob main port Turkey**, was \$580-600 per tonne on July 9, down by \$10 per tonne from \$590-610 per tonne the previous week.

"The fall accelerated after softening signals from East Asia and because business narrowed due to European quotas," a Turkish trader said. "The market has now gone into free-fall. I heard rebar from mills at \$550 per tonne FOB."

A second trading source said that there was no short-term story that could reverse the current market direction. "The decline will probably continue," the source said.

"Pressure on prices is continuing because of the fall in scrap, global weakness and the holiday period," a Turkish mill source said.

Domestic

Domestic rebar prices were broadly stable to lower across Turkey, with slow construction activity and buyers' wait-and-see attitude continuing to limit trading, sector sources said.

Mills in Izmir and Iskenderun were offering rebar at 31,700-32,700 Turkish lira per tonne (\$676-698 per tonne) ex-works, including 20% value-added tax (VAT), while offers in the Istanbul region were heard at 32,600-33,600 lira per tonne.

Long steelmaker Kardemir, based in the Karabük region, launched a rebar tender on July 7 at lower prices compared with its previous sale. The producer offered 12-32mm rebar at 26,500 lira per tonne ex-works, excluding 20% VAT, equivalent to 31,800 lira per tonne including VAT, and sold 44,000 tonnes before closing its order book later the same day.

This compared with Kardemir's rebar tender on June 25, when the company offered rebar at 26,675 lira per tonne ex-works.

Fastmarkets' weekly price assessment for **steel reinforcing bar (rebar), domestic, exw Turkey**, was 31,700-32,600 lira per tonne ex-works on July 9, unchanged from the previous week.

And the weekly price assessment for **steel wire rod (mesh quality), domestic, exw Turkey**, was 32,700-33,700 lira per tonne on July 9, unchanged from the previous week.

Billet

The steel billet market remained under pressure, meanwhile, with limited buying interest because of weak rebar demand and falling scrap costs, market sources said.

Russian billet was on offer to Turkey at \$515-520 per tonne CFR, according to trade sources, while workable prices were reported around \$500-515 per tonne CFR. Chinese billet was heard around \$515 per tonne CFR.

Fastmarkets' weekly price assessment for **steel billet, import, cfr main port Turkey**, was \$500-515 per tonne on July 9, down by \$7-10 per tonne from

Steel slab news

Italian steel slab import prices decline week on week on more competition among suppliers

By Ivelina Nikolova - Thursday 09 July

Prices for steel slab imports into Italy edged downward in the week to Thursday July 9, with some market participants citing increased competition among Asian suppliers, while others said that the market remained in wait-and-see mode following the introduction of the EU's new steel import quota regime.

The latest offers of slab deliveries to Italy were heard in the range of \$570-600 per tonne CIF during the week.

The lower end of the range, around \$570-585 per tonne CIF, was reported for material from Indonesia, Vietnam and China, while trade sources reported higher prices of \$580-600 per tonne CIF from other Asian and Southeast Asian suppliers.

Fastmarkets' weekly price assessment for [steel slab, import, cif Italy](#), was \$570-590 per tonne on Thursday, down from \$580-600 per tonne a week earlier.

"Slab prices are softer as expected. [There are] many more suppliers around, explained by the quota modifications," a buyer source said on Thursday, referring to the [reduction in country-specific import allocations](#) under the EU's revised safeguard measures, which came into force on July 1.

The measures target imports of finished steel products, such as plate and hot-rolled coil, which are produced from slab. Import quotas for some product categories and supplying countries were cut significantly, limiting access to the EU market. This could encourage exporters affected by the changes to offer more semi-finished products, such as slab, increasing competition among suppliers, Fastmarkets understands.

But a second buyer said that supplier availability remained largely unchanged, adding that the market was in a "wait-and-see position" while participants assessed how the new quota system would work in practice and how volumes would be customs-cleared.

A trade source linked the decreasing slab prices to lower offers from Indonesia, adding that there were considerable slab quantities available for sale, with load readiness until late August.

"They are still looking out for Iranian material, which is available at \$475 per tonne CFR Indonesia for 3sp-grade material," a trader source in southeast Asia told Fastmarkets.

The weak Indonesian rupiah also continued to weigh on buying sentiment, with steelmakers unable to pass on the cost of purchasing imported semi-finished steel to downstream long steel buyers.

The Indonesian currency weakened to 18,307.80 rupiah to \$1 on July 9, compared with 17,700.50 rupiah to \$1 on June 16.

Indian induction furnace-based material was also on offer to Southeast Asia, sources said, at around \$480 per tonne CFR – although the grade, quality and

name of the steel mill could not be confirmed.

One major Indonesian blast furnace-based steel producer was said to have kept its offer price at \$470 per tonne FOB for billet with a September laycan so far this week.

Fastmarkets' price assessment for **steel billet import, cfr Manila** was \$475-480 per tonne on Thursday, **widening up by \$3 per tonne from Tuesday**.

Fastmarkets' price assessment for **steel billet import, cfr Indonesia** was \$475-480 per tonne on Thursday, widening up by \$3 per tonne from Tuesday.
