Upcoming second-quarter outages also are adding to supply concerns, keeping prices elevated in the short-term. Sources suspect HRC could reach \$1,000 per ton but are skeptical regarding further price upside, a distributor said.

Lead times are around four to 10 weeks, sources said.

Quote of the day

"I do think we will eventually break the \$50 per cwt mark, but I'm not sure if there is enough steam to make it far past that," one source said.

'ArcelorMittal effect' consolidates European HRC prices despite limited demand

By Julia Bolotova - 13 Feb 2026

European hot-rolled coil prices inched up slightly on Tuesday February 17, but trading remained limited; the market was digesting news about new offers for May delivery, sources told Fastmarkets.

"The market was astonished by ArcelorMittal's move to increase [flat steel] prices by another €50 [\$59] per tonne," a buyer in Germany said. "Other mills are not following the move so far, but insist firmer on current offers; the room for discounts is very limited."

Several market sources confirmed that ArcelorMittal increased its offers for May delivery coil by €50 per tonne compared with offers for coil with April lead times.

According to several sources, new headline offers for HRC stand at €750 per tonne base delivered, €880 per tonne base delivered for cold-rolled coil and €870 per tonne base delivered for hot-dipped galvanized coil. April-delivery coil was said to be completely sold out at the supplier, with €700 per tonne base delivered (€680-685 per tonne ex-works) achieved in some transactions for HRC.

At the same time, much lower offers were still available in the market from other integrated suppliers.

Notably, April-delivery coil was offered in Germany at €680 per tonne ex-works and at €670-680 per tonne ex-works in the Benelux area. One re-roller was heard to still be offering HRC at €650 per tonne ex-works.

Estimations of achievable levels from buyers in the region varied from €650 per tonne to €680 per tonne ex-works, depending on tonnage and supplier.

April-delivery HRC was heard to still be available at other producers.

"I expect European mills will increase their offers once they collect their April tonnages," a buyer in Northern Europe said.

"It's the 'ArcelorMittal effect' on the market. New much higher offers help to consolidate previous price levels in deals," a third buyer said.

At the same time, real demand remained stable, with all recent HRC prices attributed to effects of the EU's Carbon Border Adjustment Mechanism

(CBAM) and new safeguards, rather than consumption increases.

As a result, Fastmarkets' daily steel hot-rolled coil index domestic, exw Northern Europe was €662.81 per tonne on February 17, up by €2.81 per tonne from €660 per tonne on February 16.

The index was up by €8.64 per tonne week on week and by €22.31 per tonne month on month.

Fastmarkets' corresponding daily steel hot-rolled coil index domestic, exw Italy was calculated at €656.20 per tonne on February 17, up by €4.60 per tonne from €651.60 per tonne on February 16.

The index was up by €11.20 per tonne week on week and up by €24.95 per tonne month on month.

In Italy, April-delivery HRC was still said to be available at local suppliers.

Offers from integrated mills were heard at €700 per tonne base delivered (€685 per tonne ex-works) and around €660 per tonne ex-works from re-rollers.

Minor-tonnage deals were heard concluded at €650-660 per tonne ex-works — in line with buyers' estimations of achievable prices.

Some sources claimed that for bigger volumes (over 3,000 tonnes) it was still possible to get €630-640 per tonne ex-works. At the same time, sources suggested that, following ArcelorMittal's move, local suppliers were likely to stop providing discounts.

Import activity remained subdued, with market participants describing trading as sluggish. Mainly big buyers were still in the market for import tonnages, while small- and medium-sized buyers were relying more on European material.

"Primarily larger buyers — including re-rollers, steel service centers and tube producers — continue to place import orders in an effort to lock in volumes ahead of the introduction of new safeguard measures," a buyer in Italy said.

Offers for small-tonnage cargoes from ports were reported at no less than €610-640 per tonne DDP, though buying interest at those levels was said to be limited.

Sources said that some buyers were adding a clause to contracts for new import bookings, asking for material to be custom-cleared only when new safeguard quotas volumes are revealed for individual origins. Only total allocations were revealed in the draft proposal in October 2025, Fastmarkets reported, with proposed annual quota for HRC (category 1) to be reduced from 7.7 million tonnes to 5.2 million tonnes. Information on country-specific quotas was not yet available.

At the same time, several market sources told Fastmarkets that one large steelmaker in Europe purchased 100,000 tonnes of HRC from India, with prices reported around €490 per tonne CFR, excluding CBAM. Sources claimed that the mill opted for import coil purchasing due to technical difficulties and reduced output at domestic assets.

"They booked [HRC] for CRC production as well for their tubing mill, to compensate for production losses," a source in Europe said.

Steel plate news

US domestic plate prices rise following mill price increases

By Melissa VanDervort - 17 Feb 2026

Plate prices in the US increased for a third consecutive week on Tuesday February 17, following recent mill price hikes from Nucor and SSAB, as sources continue to report strong demand and healthy spot trading in the domestic market.

Fastmarkets' weekly assessment for steel cut-to-length plate carbon grade, fob mill US was \$56 per hundredweight (\$1,120 per short ton) on Tuesday February 17, up by \$1.50 per cwt, or 2.75%, from \$54.50 per cwt on February 10.

Inputs were collected in a range from \$54-57 per cwt, representing offers and general assessments of the market.

Demand for domestic plate continues to experience an upswing halfway through the first quarter of 2026, with multiple sources reporting increasingly improved demand and spot trading .

Steelmakers Nucor and SSAB announced plate price increases of \$50 per ton and \$60 per ton respectively, marking the third mill price hike in the past two months — an upward price move that most sources expect will be accepted by the market.

Nucor announced a plate price increase of \$50 per short ton in a letter to customers on Friday February 13, followed by SSAB with an increase of \$60 per short ton in a customer letter on Monday February 16.

"I am still trying to figure out if the recent \$50-60 per ton price increase announcements will be accepted [by the domestic plate market], given the lack of foreign [plate] offers and relative tightness of the market," a buyer said. "I still believe that the steel market will peak in April or May, but not [expecting a] significant drop in prices in the second half of the year."

"There is too much upside pressure [in the plate market] to not put through the [price] increase," a distributor said.

A second distributor shared a similar view, saying, "We expect another round of increases for both March and April, and then see where the market is headed into summer and if real demand kicks in. The supply-side cost will push increases in Q1, and if demand kicks in then we could have a run. It's just a little too early to tell."

Lead times were reported at six to eight weeks.
