steelmaking raw materials – **coke and coking coal** – contributed to the recent rally in steel prices, according to sources.

The first round of price increases of 50-55 yuan (\$7-8) for coke would take effect across China's spot markets on Thursday August 20, after three rounds of price cuts, sources said.

Higher raw material costs are expected to underpin steel prices in the near term, several sources said.

Fastmarkets' weekly price assessment for **steel plate domestic, ex-whs Eastern China**, was 3,370-3,420 yuan (\$501-508) per tonne on Friday August 14, widening from 3,380-3,400 yuan per tonne a week earlier on August 7.

Lower raw material costs fail to raise China steel mill margins: ferrous analytics

By Jessica Zong, Paolo Frediani - Tuesday 18 August

Chinese steel mills remained under margin pressure in July despite a sharp decline in raw material costs.

Fastmarkets' Ferrous Analytics report helps subscribers keep track of hot metal costs and steel production spreads in China, along with key pricing components of the steelmaking raw materials supply chain in Asia.

Find the latest report [here](#).

"The U.S. Navy has experienced several shipbuilding setbacks stemming from overly complex designs and iterative design change procedures, which have resulted in cost growth, delays, and cancellations," the White House said. It added that limited capacity and competition have contributed to significant backlogs in six major Navy shipbuilding programs.

The White House noted that Trump previously signed an executive order on maritime dominance, established an Office of Maritime and Industrial Capacity within the National Security Council and released a Maritime Action Plan in February 2026 aimed at expanding shipbuilding, repair, transportation and port infrastructure capabilities.

The White House said strengthening domestic shipbuilding capacity is critical to both national security and economic competitiveness, framing the initiative as part of a broader effort to restore what it called American maritime dominance.

Industry participants will be closely watching the implications of the program for US steel demand, particularly plate products used in naval vessels, submarines and commercial shipbuilding projects, as well as potential opportunities for domestic manufacturers supplying components to the maritime supply chain.

Many in the maritime sector have long argued that the US faces real shipbuilding challenges, including limited yard capacity, workforce shortages, supplier bottlenecks and lengthy delays in Navy programs. The Trump memorandum directly targets those issues by expanding shipyard capacity, establishing a fifth public naval shipyard and encouraging foreign investment in US shipyards.

For steel producers and shipbuilding suppliers, the prospect of new yards, additional naval vessels and a larger maritime industrial base would generally imply higher long-term demand for shipbuilding-grade steel plate, fabricated components and marine equipment. That aligns with concerns the industry has voiced for years about the need for greater US shipbuilding capacity.

The Finland model

The most controversial element appears to be the memorandum's willingness to allow certain vessels to be built initially in foreign shipyards as part of the so-called "Finland model."

That model was outlined in a Memorandum of Understanding on October 9, 2025, between the US and Finland regarding medium icebreaker construction as a model.

The administration argues this approach could quickly add capacity while requiring foreign builders to invest in US yards and workers.

The foreign shipbuilder would be required to build a new shipyard in the United States or assume ownership or a majority equity position in an existing shipyard in the United States, and build all ships after the first two such ships in US shipyards, the White House stated August 13.

The chosen foreign shipbuilder would also hire and train an American citizen workforce for the United States shipyards, license proprietary shipbuilding techniques and technologies used at the parent foreign shipyard to the United States shipyards; and source a United States supply chain for construction and maintenance of all ships at the United States shipyards.

The Shipbuilders Council of America, the national trade association representing the US shipyard industry, opposes the initial foreign construction of some ships in return for investment in the US.

"While foreign investment into the US-based shipyards and facilities is lauded to reach the Administration's goals of revitalizing the shipyard industrial base, directing the Department of War to build overseas only undercuts the federal Maritime Action Plan and generational investment into commercial and government shipbuilding," Matthew Paxton, president of the council, told Fastmarkets Monday August 17.

"Every hull built abroad is demand, jobs, and industrial capability diverted from American shipyards this Administration pledged to rebuild," Paxton said.

"We urge the Department to reverse course and redirect this funding to qualified US shipyards and we remain committed to working with the Department of War, the US Maritime Administration, and Congress to keep federal shipbuilding dollars strengthening --- not bypassing -- the domestic maritime industrial base."

The Shipbuilders Council of America points to underutilized domestic capacity providing the capacity to build the nation's future fleet and has claimed that outsourcing production poses a national security risk by exposing sensitive classified integration, combat systems and proprietary technologies.

"The federal policy for US shipbuilding should focus on maximizing and scaling domestic industrial output before sending taxpayer dollars abroad to support foreign countries and foreign workers," the council has stated.

"Every dollar spent on a foreign shipyard is a dollar pulled away from developing the US domestic workforce, skilling, nextgen technology, supply chains, and facility investments," the council stated.

"Demand is not super robust. Even so, if Oklahoma and Peoria do not come back online [soon enough], there could be another \$20 per ton price increase," a distributor said.

A mill source noted that Liberty Steel in Peoria should be "fully operational" by October following its ramp-up, improving available supply.

Alternative rod

Domestic alternative rod prices were mixed in August, according to sources.

Fastmarkets' monthly price assessment for **steel wire rod (high carbon)**, fob mill US, was \$71 per cwt on Tuesday, up by \$0.50 per cwt or 0.71% from \$70.50 per cwt on July 21, when it was unchanged since March 17.

And Fastmarkets' monthly price assessment for **steel wire rod cold-heading quality**, DDP, was \$75 per cwt on Tuesday, unchanged since March 17.
