## Hot-rolled coil news

## Domestic flat steel prices rise in Brazil as importers shift away from China

By Nina Gattis - Tuesday 18 November

Brazilian domestic flat steel prices rose in the month to Friday November 14, with Brazilian flat steel distributors increasingly leaning toward domestic purchases, sources told Fastmarkets.

This comes amid growing expectations of anti-dumping measures against Chinese imports across Latin America.

Fastmarkets' monthly price assessment for steel hot-rolled coil, domestic, monthly, exw Brazil was 3,935-4,175 Reais (\$743-788) per tonne on Friday, up by 9.59% from 3,500-3,900 Reais per tonne a month earlier.

The price reflects a recovery following five consecutive months of declines and the increase announced by domestic mills in September, sources said.

"There's absolutely no doubt that prices have stopped falling. The mills' increase stuck — not to the magnitude they expected, but it did stick," a distributor source said.

The upward momentum also comes as the market anticipates anti-dumping measures that could include Chinese HRC, according to sources.

"Our belief is that the anti-dumping measures, although slow and time-consuming, will start to be implemented in November [and] December, and perhaps the last products, which are related to hot-rolled coil, [...] in February," Brazilian steel producer Companhia Siderúrgica Nacional (CSN) executive director and board member Luis Fernando Martinez said during the company's latest earnings call on November 5.

Distributors from different regions of Brazil reported broadly aligned HRC price levels, with the upward trend also extending to coated steel, for which anti-dumping measures are expected to arrive sooner than for HRC.

"We expect to score anti-dumping measures on pre-painted steel and

possibly galvanized products," Martinez said during the earnings call.

According to CSN, new anti-dumping actions could help the company recover 5.0-7.5% of its share in Brazil's coated steel market.

Fastmarkets' monthly price assessment for steel hot-dipped galvanized coil, domestic, monthly, exw Brazil was 5,120-5,435 Reais per tonne on Friday, up by 10.76% from 4,530-5,000 Reais per tonne a month earlier.

But cold-rolled coil recorded only a slight increase.

Fastmarkets' monthly price assessment for steel cold-rolled coil, domestic, monthly, exw Brazil was 4,330-4,800 Reais per tonne on Friday, narrowing upward by 0.33% from 4,300-4,800 Reais per tonne on October 10.

The modest rise reflects the still-elevated levels of CRC imports into Latin America.

Fastmarkets' weekly price assessment for steel cold-rolled coil import, cfr main ports South America was \$560-630 per tonne on Friday, up by 5.31% from \$550-580 per tonne a week earlier.

## Rebar under pressure

While flat steel prices are trending upward, the Brazilian rebar market edged slightly lower amid limited demand, with distributors reluctant to sell inventory at the higher price levels introduced by domestic mills in September, sources said.

Fastmarkets' monthly price assessment for steel reinforcing bar (rebar), domestic, monthly, delivered Brazil was 3,200-3,600 Reais per tonne on Friday, down by 0.44% from 3,200-3,630 Reais per tonne a month earlier.

"Demand for rebar has dropped sharply in Brazil. Mills are still trying to push through a price increase in this market, but the top-end price isn't reacting," a rebar distributor source said, adding that margins have contracted over the year.

"No matter how hard the mills try, it's difficult because everyone is well-stocked. I don't see a very strong end of the year ahead for us," the rebar distributor source said.

## Steel plate news

# US domestic steel plate prices unchanged in middling market

By Melissa VanDervort - Tuesday 18 November

**Steel plate prices in the US were steady on Tuesday November 18, with market participants describing a mostly muted spot environment plagued by continued soft demand and minimal trading.**

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$50 per hundredweight (\$1,000 per short ton) on Tuesday, stable since falling by 1.96% on September 9 from \$51 per cwt on September 2.

Inputs were collected in a range of \$50-53 per cwt, representing offers and general assessments of the spot market.

The domestic plate market is stagnant, with sources reporting mostly flat demand and muted spot trading in the lead up to the seasonally slow holiday period in late November and December.

"I'm thinking [that] December will officially be flat," a distributor source said. "There really is only two weeks in December for business, so it is pretty much a wasted month for mill buys."

A second distributor shared a similar view, saying they "haven't seen much change on the plate side. Demand is flat to weak, and pricing has remained in the \$50 [per] cwt range overall."

"Demand is fairly flat, not necessarily at a bad level, but not increasing. [Demand] feels fragile, but that is not unusual for this time of year," a third distributor said. "I think we will be treading water at this level through the end of the year, until we see the normal seasonal increase in demand in January."

Despite middling demand, some market participants anticipate that plate prices will rise in the near term, following steadily climbing hot-rolled coil prices.

"We do expect plate [prices] to increase heading into the new year, as [the hot-rolled price] seems to be on the fast track upward — and plate will follow," the second distributor said.

Lead times were reported at three to four weeks.
