HRC offers remained largely confined to Europe in early October, with exporters reporting selective availability from Indian mills, while another exporter reported no fresh export activity on October 14.

Coated exports were similarly selective. Galvanized material of 0.58 mm thickness was indicated around \$1,020 per tonne CFR for Z140 coating and \$1,000 per tonne CFR for Z100 at the end of September, with indications reported unchanged a week later.

During market discussions in the week ended September 18, a trader also reported an earlier transaction involving approximately 50,000 tonnes of Chinese HRC from Benxi Iron & Steel, with Honors Commodities identified as the seller and a reported price of around \$550 per tonne CFR, plus or minus \$5 per tonne.

The material was understood to be associated with an advance-authorization arrangement, although Fastmarkets could not independently verify the reported transaction or its precise booking date.

Another exporter questioned the reported volume and the number of eligible buyers capable of absorbing such a cargo under advance authorization, warning against treating it as representative of ordinary duty-paid HRC imports.

Separate reports involving a potential HRC cargo from Japan's JFE Steel were also discussed during the same September period, but the transaction, volume, price and booking date could not be confirmed.

The import discussions highlighted growing attention to the differential between elevated Indian domestic prices and overseas steel values, although neither report provided a verified benchmark for the wider Indian import market.

Government data showed India's finished-steel imports rose by 23.8% year on year to 4.14 million tonnes during April-September, leaving the country a net importer of finished steel over the period.

Draft steel policy sets longer-term direction

Meanwhile, India's Ministry of Steel released its draft National Steel Policy – Vision 2047 for public consultation in October, outlining a longer-term roadmap for capacity expansion, raw-material security, higher-value steel production and lower-emission steelmaking.

The draft envisages crude-steel capacity reaching 604 million tonnes by 2047, compared with around 220 million tonnes currently, alongside projected finished-steel consumption of 505 million tonnes.

It also highlights the need to strengthen domestic manufacturing and downstream steel industries while improving access to critical raw materials and enhancing global competitiveness.

Stakeholders have until October 30 to submit comments.

In the immediate market, however, the key question is whether underlying steel consumption can sustain elevated prices after the earlier rush to buy ahead of producer increases has eased.

Steel plate news

US domestic plate prices increase on continued strong demand

By Melissa VanDervort - Tuesday 20 October

US plate prices rose on Tuesday October 20 as robust demand and constrained supply continued to put upward pressure on the domestic market, sources said.

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$78 per hundredweight (\$1,560 per short ton) on Tuesday October 20, up by 1.30% from \$77 per cwt on October 13.

Inputs were collected in a range of \$72-80 per cwt, representing offers and general indications of the spot market.

Strong demand continues to dominate the domestic plate market, applying upward pricing pressure as buyers struggle to fill gaps in dwindling inventory levels, sources said.

"Demand is good. Anyone calling for a price today that doesn't buy is finding it will be sold out when they call back," a distributor said. "Today's expensive price is definitely tomorrow's bargain, and the following day it's gone and buyers need to start the process all over again. If something is in stock and you need it within two [to] three months, you need to buy it now! I'm seeing customers that want to know what's in stock, and then they don't buy. They call back and the material is not only gone but gone many times over."

A buyer said, "We are running at full capacity and have enough orders on the books to keep us at 100% capacity for the next several weeks. Demand is as strong as we have ever seen."

Plate mills are largely sold out of spot tons for the balance of 2026 and are booking orders for early next year, according to a second buyer.

"We have inquired [about] plate with the domestic steel mills, [but] so far, we have not received any spot ton quotation," the second buyer said. "They are telling us to check back later when they do open their January order books."

Market participants expect tight supply conditions and elevated demand to continue through at least the first half of 2027.

"[Supply] will remain tight through [the] first half of next year, and many of the plate mills are closed [for orders] for the year [2026] pretty much," a second distributor said.

A third distributor said, "[We] don't see much changing for [the] balance of 2026. [There is] good demand, super tight supply, low service center inventories—all playing out for the foreseeable future. Plate mills are still very behind on deliveries [and we are] hoping they can catch up sometime [in] Q1 [of 2027]. It's definitely more about supply versus price at the moment. Otherwise, there looks to be little change from what we are seeing today until Q2 [of] 2027 sometime."

Lead times were approximately eight to 12 weeks.

China's steel billet exports keep falling amid price downtrend in key markets

By Jessica Zong - Tuesday 20 October

China's exports of steel billet continued the month-on-month downward trend in September, according to data published by General Administration of Customs of China (GACC) on Tuesday October 20.

Exports of steel billet under Harmonized System (HS) codes 72071100 and 72072000 totaled 1.31 million tonnes in September, down by 9% from 1.43 million tonnes in August, but up by 1% from 1.30 million tonnes in September 2025, according to GACC's data.

China's exports for steel billet

Source: General Administration of Customs of China

Indonesia remained the largest buyer of Chinese steel billet in September, with 144,449 tonnes and accounting for 11% of total exports.

The Philippines ranked second, with purchase tonnages of 140,587 tonnes, or 11% of total exports, while Malaysia imported 92,824 tonnes, representing a 7% share.

The price drop in key target markets led to lower profit margins for exporting billet and pushed down China's steel mills' interest in exporting the product, sources said.

For instance, Fastmarkets' twice-weekly price assessment for **steel billet import, cfr Indonesia** was \$485-490 per tonne on September 29, compared with \$490 per tonne on September 1. The prices further dropped to \$482-483 per tonne on October 15.

Fastmarkets' daily price assessment for **steel billet domestic, exw Tangshan, Northern China** was 2,950 yuan (\$442) per tonne on October 19, down by 100 yuan per tonne from 3,050 yuan per tonne on August 31.

Market participants said the export offers for 3sp steel billet were at \$468-470 per tonne FOB China on Tuesday.
