Market activity was slow on July 21, with trade sources citing weak demand during the approaching summer holiday period.

Fastmarkets' daily [steel hot-rolled coil index domestic, exw Northern Europe](#) was calculated at €712.29 per tonne on July 21, down by €1.46 per tonne from €713.75 per tonne on July 20.

The index was up by €2.29 per tonne week on week and up by €26.03 per tonne month on month.

In Italy, a trade source reported a deal from a major supplier at €700-710 per tonne ex-works for September delivery, adding that they expected a "big step would happen in September after [the summer] vacation."

A second trader reported indications of workable levels at €710-720 per tonne ex-works. However, no transactions were reported within that range, while trading activity remained limited amid weak market sentiment. As a result, the price was not given sufficient weight to influence Tuesday's index.

On July 20, a seller reported a deal at €700 per tonne ex-works, which was carried over to Tuesday's index, in line with Fastmarkets' methodology.

Fastmarkets' daily [steel HRC index domestic, exw Italy](#) was €702.50 per tonne on Tuesday, unchanged day on day.

The index was up by €3.12 per tonne week on week and up by €20 per tonne month on month.

Saudi Arabia steel HRC import prices down again on weak demand

By Serife Durmus - Tuesday 21 July

The prices for steel hot-rolled coil imports into Saudi Arabia has continued to decrease during the week ending Tuesday July 21 while demand has remained weak, trade sources told Fastmarkets.

The beginning of summer, as well as the uncertainty about the conflict between Iran and the US affecting the Middle East region, were the reasons given for the weak demand.

"Nobody can predict when the market will improve - politics affect everything. Freight is also still a major uncertainty," a trader said.

Freight costs have been [affecting the market recently](#).

China offered hot-rolled coil of 1.2mm gauge at \$585-590 per tonne CFR Jeddah, down from previous offers at \$620 per tonne CFR.

One deal for 3mm HRC was concluded at \$555 per tonne CFR Jeddah.

Fastmarkets' weekly price assessment for [steel hot-rolled coil, import, cfr Saudi Arabia](#) (1.2mm gauge), was \$585-600 per tonne on July 21, falling from \$590-620 per tonne on July 14.

Steel plate news

US domestic steel plate prices steady amid robust demand, tightening supply conditions

By Melissa VanDervort - Tuesday 21 July

US steel plate prices were stable on Tuesday July 21 after rising for two consecutive weeks prior, with market participants reporting sustained solid demand, diminished buyer inventories and an ongoing lack of spot material.

Fastmarkets' weekly assessment for steel cut-to-length plate carbon grade, fob mill US was \$70 per hundredweight (\$1,400 per short ton) on Tuesday July 21, steady from July 14 and up by 1.45%, or \$1.00 per cwt, from \$69 per cwt on July 7.

Inputs were collected in a range of \$67.50-72.00 per cwt, representing offers and indications of the general spot market.

Demand for domestic plate remains elevated more than halfway through the summer months, with market participants describing depleted buyer stock levels and scant availability of spot material.

"There is no spot availability in the market [right now]. Our steel costs are very high and we are struggling to get steel as well," a buyer said. "Everybody is struggling, from forging shops, to casters, to finishing companies. Even the big integrated mills are straining."

The buyer said that inventory levels in the domestic market are running dangerously low.

"All the stories about inventory I hear are that they are shrinking month by month, and customers cannot place enough orders to even slow the inventory decline, much less get back to a level they feel more comfortable with given current levels of demand," the buyer said. "My recommendation would be to buy what you need two to three months down the road today, as prices are going up and supply is not guaranteed."

Nucor raised plate prices by \$60 per ton (\$3 per cwt) on July 15 — the steelmaker's first increase since April — an upward price move widely anticipated by sources, citing strong demand.

"I do believe the mills are trying to push the [spot plate] number above \$70 [per] cwt," a distributor said.

A second distributor shared a comparable view, saying, "[I] would not be surprised to see another [price] increase for October [production]. Plate demand is good, supply is tight and [it] will be for the balance of the year."

Supply tightness and spot ton shortages are expected to persist throughout the summer and fall months, with some mills quoting orders as far out as late October.

"Demand is good — in fact, [it is] super better than good. [Some mills] have no spot tons available, and [they] are quoting late October for new deliveries," a third distributor said.

Lead times were reported at eight to twelve weeks.
