The latest data from China Customs showed that China's cumulative exports of NGOs fell by 9.86% year on year to 398,700 tonnes in January-July 2026, while CRGO exports slipped by 0.91% to 459,700 tonnes over the same period.

Imports of both products also declined, with January-July imports of NGOs and CRGO electrical steel down by 18.83% and 22.46% year on year respectively.

Brazil rebar prices rise following long stability; flat steel prices remain subdued

By Nina Gattis - Monday 24 August

After roughly three months of stability, Brazil's domestic reinforcing bar price rose in the week to Friday August 21, supported by factors that provided momentum for mills to push through an increase after multiple failed attempts, sources said.

Fastmarkets' weekly price assessment for **steel reinforcing bar (rebar), domestic, weekly, exw Brazil** was 3,600-3,785 Reais (\$700.50-736.50) per tonne on Friday, up by 85-100 Reais per tonne from 3,500-3,700 Reais per tonne a week earlier.

Some sources said a resilient construction sector and shortage of scrap in the country were among key drivers of prices.

"For example, a mill that has a huge order book but may not be able to fulfill it due to difficulties in scrap procurement. As a result, production is falling and that opens space for other mills to push new prices for incoming orders," a distributor source said.

Some market participants were of the view that factors like raw material shortages and sporadic exports were behind the increase in prices as well.

"A domestic mill exported around 40,000 tonnes of longs last month. These moves reduce supply, increase scrap buying pressure, and make competitors struggle. This works in the short term, but I'm not sure it is sustainable," the distributor source said.

Some sources also told Fastmarkets they were optimistic toward an improvement in the market, amid signs of firmer end-use demand.

"Speaking with customers across Brazil, we are seeing this consistently. Previously, cut-and-bend delivery lead times were around 5 days; now they are 11 to 12 days, which clearly shows higher demand," a producer source

said.

Weak demand keeps flats stable

Flat steel prices in Brazil remained stable over the same week, including hot-dipped galvanized coil, which was the only product that had posted a slight decline in the previous week.

Fastmarkets' weekly price assessment for **steel hot-rolled coil, domestic, weekly, exw Brazil** was 3,960-4,180 Reais per tonne on Friday, unchanged week on week.

The corresponding weekly price assessment for **steel cold-rolled coil, domestic, weekly, exw Brazil** was 4,800-4,990 Reais per tonne on Friday, flat from the previous assessments.

Fastmarkets' weekly price assessment for **steel hot-dipped galvanized coil, domestic, weekly, exw Brazil** was 4,900-5,125 Reais per tonne on Friday, also stable from a week earlier.

Sources told Fastmarkets that concerns over weak demand and a stagnant market continued to linger among market participants.

"Everyone is quiet, no deals are being done, and we are already past the middle of the month and approaching the end. It is very likely I will close the month below target, under expectations," a second distributor source said.

However, there are expectations that mills may manage to hold prices in the current difficult environment, according to sources.

When asked whether there is a downside bias in prices, Brazil's National Institute of Steel Distributors (INDA) president **Carlos Loureiro told Fastmarkets** that "anything is possible."

"[But] in my conversations with mill sources, I don't see any willingness to lower prices," Loureiro said during INDA's monthly conference call on Thursday August 20. "If they have a bit of resilience and common sense, they shouldn't move prices, which are already competitive relative to imports."

"Prices are stable but not firm. However, we have not seen any price changes from the mills yet," a third distributor source said, adding that weak demand remains a key concern.

"It is good in the sense that it gives you stability to plan ahead, but there is no demand, so it does not really help. Even maintaining prices is already something of a heroic effort, but there is not even price competition because demand is absent," the second distributor source said.

Steel plate news

SSAB Americas increases steel plate prices by \$40 per ton

By Melissa VanDervort - Monday 24 August

SSAB Americas, the North American division of Swedish steelmaker SSAB, announced a plate price increase of \$40 per short ton (\$2 per hundredweight) on all plate products in a letter to customers on Monday August 24, Fastmarkets has learned.

The increase is "effective on all new non-contract orders confirmed to ship October 4, 2026 and beyond", the letter stated.

SSAB last raised plate prices by \$40 per ton (\$2 per cwt) on [July 8](#).

US steel plate prices increased for a third straight week on [Tuesday August 18](#), with market participants noting that persistently strong demand and spot supply constraints had continued to apply upward pricing pressure on domestic plate.

Fastmarkets' weekly assessment for [steel cut-to-length plate carbon grade, fob mill US](#) was \$74 per hundredweight (\$1,480 per short ton) on Tuesday August 18, up by 1.37%, or \$1.00 per cwt, from \$73 per cwt on August 11.

The design also supports improved grain flow and structure, which can enhance the strength, toughness and ductility of finished rebar. More uniform deformation during rolling can improve roundness and dimensional accuracy, Tata Steel said.

"The BIS license is a significant validation of the capability we have developed at Ludhiana," Tata Steel Vice President of Technology, Research and Development, NMB and Graphene, Subodh Pandey, said. "It highlights Tata Steel's continued focus on technological excellence and differentiated product offerings that contribute to a greener steelmaking ecosystem."

Tata Steel Ludhiana is a **scrap-based electric-arc furnace (EAF)** steelmaking facility inaugurated in March 2026, with an annual production capacity of

0.75 million tonnes. The plant uses 100% steel scrap as its raw material, with around 40% sourced from Tata Steel's recycling plant in Rohtak, Haryana.

Nearly half of the facility's electricity requirement comes from renewable energy sources, supporting lower-carbon steel production. The plant produces construction-grade steel rebar under Tata Steel's Tata Tiscon brand, according to the company.

Fastmarkets' twice-weekly calculation of the **steel scrap shredded, index, import, cfr Nhava Sheva**, India was \$388.43 per tonne on August 21, up from \$384.81 per tonne on Tuesday August 18, and \$380.84 per tonne on August 14.
