*In case of Container Cargo please add additional freight Charges USD 60 in Value (CR/HR/GP Secondary)

The capacity additions come against a backdrop of continued growth in Indian steel demand.

Indian steel consumption rose by 7% year on year to 43.4 million tonnes during July-September and by 7.5% during the first half of the financial year, according to JSW.

JSW's India operations, meanwhile, produced a record 7.07 million tonnes of crude steel during the September quarter, up by 5% year on year and 11% quarter on quarter, with capacity utilization at 88%.

Cleveland-Cliffs defends Stelco job cuts, reiterates steelmaker is in compliance with Ottawa

By Rijuta Dey - Tuesday 27 October

Cleveland-Cliffs, based in Cleveland, Ohio, said it is in compliance with its Investment Canada Act undertakings, four days after Canadian Industry Minister Mélanie Joly gave the company 15 days to reverse layoffs at its Canadian subsidiary Stelco's Hamilton plant or face consequences.

In a statement shared with Fastmarkets on Monday October 26, Cleveland-Cliffs said Stelco has delivered a letter to Joly, "providing an updated report on Stelco's compliance with the undertakings made in connection with Cleveland-Cliffs' acquisition of Stelco under the Investment Canada Act."

"Together with its legal counsel, Cliffs performed an exhaustive review of its compliance with each commitment and the letter submitted today confirms that Stelco is in full compliance with each of its 34 undertakings," Cliffs said in Monday's statement.

"In several important areas, Stelco's performance exceeds the commitments that were made at the time of the acquisition," according to the Cliffs statement. "This includes the employment undertakings."

Cliffs also requested a meeting with Joly via Stelco on October 23, according to Monday's statement.

"In response to Minister Joly's many public requests for a dialogue with Cleveland-Cliffs, on October 23, Stelco requested a meeting with her and Cleveland-Cliffs Chairman and chief executive officer Lourenco Goncalves to discuss a path toward resuming full employment of the 175 workers in Hamilton who have been temporarily laid off."

"Notwithstanding her publicly stated willingness to sit down, the Minister has not yet responded to this request," the Cliffs statement said.

Cliffs Chief Executive Officer Lourenco Goncalves said the company "made serious commitments to Canada when we acquired Stelco, and we have honored them. Stelco is in full compliance with all undertakings, and in several important areas we have gone beyond what we committed to do."

Goncalves added that "for galvanized products, the imports of non-automotive galvanized steel that continue to flood the Canadian market remain problematic. We want to find a solution for Hamilton and its workers

as soon as possible and believe common sense trade policy will make this a reality."

Goncalves' Monday statement was an echo of comments he made during the [company's earnings call on Monday October 19](#), when he said if the Canadian government restricts steel imports, then the company can rehire the workers who were laid off at Stelco.

"If the Canadian government use the power they already have, they have the ability to unilaterally exercise to block or severely reduce imports of Galvanneal steel into the Canadian market, Stelco can immediately bring back all the temporarily laid-off workers because that would immediately give us a market to sell and the ability to produce Galvanneal steel," Goncalves had said on October 19.

Cliffs had confirmed on September 28 it would [idle cold-rolling and coating operations at Stelco's Hamilton steel plant](#) — union leaders estimated the indefinite idling [could affect as many as 450-500 jobs](#), including job cuts at Stelco's Nanticoke facility due to the shutting of two out of three pickling lines.

Cleveland-Cliffs [blamed import competition and depressed galvanized steel prices](#) as a factor for the idling and subsequent job losses.

Cliffs' Monday statement comes four days after Canada gave the US-based parent company 15 days to reverse the planned job cuts at Stelco.

In a demand letter sent on Thursday October 22, Joly said the US-based steelmaker had violated its commitments under the Investment Canada Act and warned that if Cleveland-Cliffs failed to agree to the Canadian government's demands within 15 days, she could go to court to force the sale of the Stelco plant.

Joly said in her letter that "everything is on the table," indicating that if the Canadian government proceeded with legal action, it could ask the courts to issue monetary penalties against Cleveland-Cliffs and potentially force the company to divest from its Stelco assets.

"Let me be clear: no act of god or change in market conditions can relieve Cleveland-Cliffs of the commitments it made to Canada," Joly said in Thursday's statement that was posted on social media. "Those commitments are not optional."

Joly also noted that Cliffs' leadership has publicly championed the US government's imposition of 50% Section 232 tariffs on steel imports, noting in her letter that "advocacy of those tariffs goes against the interest of his employees, on both sides of the border, and is in direct violation of their undertakings."

Cleveland-Cliffs [acquired flat-rolled steelmaker Stelco for \\$2.5 billion on July 15, 2024](#), the deal closing on November 1, 2024.

Fastmarkets' weekly [steel hot-rolled coil index, fob mill Canada](#) was calculated at C\$84.91 (\$60.61) per cwt (C\$1,698.20 per short ton) on Thursday October 22, rising by 0.28%, or C\$0.24 per cwt, from C\$84.67 per cwt in the previous assessment.

Steel plate news

Nucor Q3 earnings more than double amid higher steel prices, record shipments

By Rijuta Dey - Tuesday 27 October

Nucor's third-quarter 2026 earnings more than doubled year on year amid higher steel prices and record mill shipments, according to an earnings release on Monday October 26.

The Charlotte, North Carolina-based steelmaker "had the best quarter in three years," Leon Topalian, chair and chief executive officer, said during the company's earnings call on Tuesday October 27. "2026 is shaping up to be the third-best financial year in the history of our company, and we fully expect that 2027 will be even stronger," Topalian said.

Nucor reported net earnings of \$1.32 billion in the third quarter of 2026, or \$5.80 per diluted share, compared with \$607 million, or \$2.63 per share, in the corresponding period of 2025. Net sales rose by 32% to \$11.25 billion from \$8.52 billion.

Pretax earnings from Nucor's steel mills rose to \$1.79 billion from \$793 million in the year-earlier quarter, supported by higher average selling prices and shipment volumes. Pretax earnings from the steel products segment increased to \$465 million from \$319 million.

Topalian said the company would continue to advocate for US trade measures, such as Section 232 tariffs, while emphasizing that domestic demand remained firm.

"Demand is very healthy," Topalian said, adding that Nucor was seeing the strongest demand environment across its product range in his 31 years at the company. "Even as imports have crept higher this year, domestic shipments have risen in each of the past three quarters."

Brandenburg plate mill's strong performance

Total steel mill shipments exceeded 7.2 million net tons during the quarter, up by 2% from the second quarter and setting a company record for the third consecutive quarter. Year-to-date mill shipments were up by 10%. Total steel mill shipments include sales to Nucor's internal customers.

"In our steel mills, quarterly shipments exceeded 7.2 million tons, setting another shipment record for the third consecutive quarter," Topalian said.

Topalian said the company's Brandenburg plate mill shipped approximately 240,000 tons during the quarter, while its bar group also achieved record quarterly shipments.

Nucor expects steel mill shipment growth for full-year 2026 to finish toward the upper end of its 5-10% forecast range, president and chief operating officer Steve Laxton said during Tuesday's call.

US plate prices rose for the second consecutive week on October 27, with market participants citing strong demand across numerous plate-consuming sectors and tight supply as continuing to apply upward pressure.

Fastmarkets' weekly assessment for **steel cut-to-length plate, carbon grade, fob mill US**, was \$80 per hundredweight (\$1,600 per short ton) on Tuesday, up by 2.56% from \$78 per cwt on October 20.

Merchant bar benefits from data-center demand

Nucor reported strong growth in merchant bar and rebar shipments, according to Randy Spicer, executive vice president of Nucor's Bar & Engineered division.

"We're in the middle of what we call the artificial intelligence (AI) Super Bowl," Spicer said on Tuesday. "The hyperscalers have committed an enormous amount of capital to these data center buildouts, and those structures require these larger sections that we're able to produce at Nucor."

Spicer said that data center demand was showing up directly in the company's merchant bar order book.

"We're at record levels to be able to take advantage of both here in 2026 as well as the growth as we go forward into 2027," Spicer said.

Data centers form part of a broader demand picture that Nucor said also includes infrastructure, manufacturing investment and energy.

“Data center construction activity has gone from a small niche to a significant driver of non-residential building construction activity,” Laxton said.

Topalian said Nucor estimates that its businesses can make or supply about 95% of the steel required inside and outside a data center.

US domestic and import prices for merchant bar quality (MBQ) steel rose in September for the fifth consecutive month amid mill price increases coupled with strong demand from the key segments of the construction sector.

Fastmarkets’ monthly price assessment for **steel bar 2 x 2 x 1/4-inch angle merchant products, fob mill US** was \$66.30 per hundredweight (\$1,326 per short ton) on September 25, up by \$1.50 per cwt or 2.31% from \$64.80 per cwt on August 28, and up by \$3.00 per cwt or 4.74% from \$63.30 per cwt on July 31.

The corresponding monthly price assessment for **steel merchant bar, loaded truck Port of Houston for immediate delivery** was \$1,160-1,260 per short ton (\$58-63 per cwt) on September 25, up by \$20 per short ton at both the low and high ends of the range, or 1.68% at the midpoint, from \$1,140-1,240 per short ton (\$57-62 per cwt) on August 28, and up by \$80 per short ton at both ends, or 7.08% at the midpoint, from \$1,080-1,180 per short ton (\$54-59 per cwt) on July 31.

Infrastructure, energy investment boosts steel demand

Infrastructure, manufacturing reshoring and energy investment are also supporting Nucor’s demand outlook, company executives said.

Laxton pointed to infrastructure projects and investment in power generation, substations and transmission infrastructure among sources of steel consumption, along with LNG terminals, pipelines and oil country tubular goods.

“Rising demand, aging infrastructure, and the need to strengthen the grid are driving substantial investment in the power sector,” Laxton said.

Investor-owned utility capital expenditure is projected at approximately \$1.4 trillion over 2026-30, according to Nucor’s earnings presentation.

Nucor executives also cited border-wall construction as a source of steel demand. Executive Vice President John Hollatz said the company estimates about 1,400 miles of new primary and secondary wall will be built, requiring roughly 1,500 tons of steel per mile.

“We have been shipping thousands of tons every week to the border,” Hollatz said. “That’s going to continue all the way through 2027 and well into 2028.”

Nucor is the “only company with the raw materials, the sheet supply, the tube capacity, and the logistics team to keep up with the demand for the border,” Hollatz said on Tuesday. “For the tube group, it’s not just border. On top of that, you’ve got a really strong demand for structural on the steel hollow sections (HSS) side.”

Fastmarkets’ latest price assessment for **4x4 steel hollow sections ASTM A500 Grade B domestic, fob mill US** was \$2,110-2,210 per short ton on Thursday October 22, while the price for **US domestic steel hollow sections (HSS) 10x10 square, fob mill US** was \$2,150-2,250 per short ton.

Nucor expects consolidated fourth-quarter earnings to be generally in line with or modestly higher than in the third quarter.

The company expects steel mills earnings to remain stable, with higher realized pricing offset by seasonally lower volumes and higher costs. Steel products earnings are also expected to remain stable, while raw materials earnings are expected to decline slightly due to lower realized direct-reduced iron pricing.

US domestic plate prices rise week-on-week amid robust demand, constricted supply

By Melissa VanDervort - Tuesday 27 October

US plate prices rose for the second consecutive week on Tuesday October 27, with market participants citing strong demand across numerous plate-consuming sectors and tight supply as continuing to apply upward pressure.

Fastmarkets’ weekly assessment for **steel cut-to-length plate, carbon grade, fob mill US**, was \$80 per hundredweight (\$1,600 per short ton) on Tuesday October 27, up by 2.56% from \$78 per cwt on October 20.

Plate demand remains elevated in the domestic market, while persistently scarce supply continues to push prices higher, according to sources.

“Supply for the balance of 2026 is done, and mills [are] not yet quoting us projects for 2027,” a distributor said. “Demand is good and supply is tight, and [it] doesn’t look to get better in the near term. That should be the story for the balance of 2026 and into 2027.”

Market participants said multiple sectors are consuming plate at a rapid rate, including energy and wind towers, data centers, shipbuilding, border wall construction and utility structures, further driving up demand.

“Many plate sectors [are] busy, be it data centers, border wall, shipbuilding, military, mining, utility structures, storage tanks...you name it, and most likely [it is] busy,” the distributor said.

Sources expect robust demand and strained supply to persist throughout 2027 and into 2028, keeping upward pressure on prices.

“Demand is awesome, stock [levels are] less than awesome but manageable with some work and planning,” a second distributor said. “Demand is projected to remain like this for 2027 and now we’re saying Q2 [of] 2028.”

Lead times varied widely, ranging from six to 12 weeks.
