Chinese steel plate export prices fall on seasonally weak demand

By Zihuan Pan - Tuesday 28 July

Prices for Chinese steel plate exports moved lower in the week to Tuesday July 28, weighed by seasonally slow demand, industry sources told Fastmarkets.

Demand from the major market, Southeast Asia, has been weak recently due to the ongoing rainy season, while orders from the Middle East have been suspended amid renewed tensions involving the US and Iran, sources said.

"Demand from South America and Africa has been relatively resilient in recent weeks," a Chinese trader said.

Chinese plate producers offered material at \$524-560 per tonne FOB China on Tuesday, unchanged from a week earlier but narrowing downward from \$524-565 per tonne FOB three weeks earlier.

Sources indicated that \$518-525 per tonne FOB was a workable range for export transactions involving Chinese steel plate from tier-2 mills, while tier-1 mills could sell at levels of up to \$535 per tonne FOB.

Fastmarkets' weekly price assessment for steel heavy plate, export, fob China main port, was \$518-525 per tonne on Tuesday, down by \$2-3 per tonne from \$520-528 per tonne a week earlier.

Weak demand, softer cost support subdue steel prices

Chinese domestic plate prices have also been weighed down by seasonally weak demand and softer support from the cost side in recent weeks, according to sources.

On the Shanghai Futures Exchange (SHFE), the most-traded October hot-rolled coil (HRC) contract ended at 3,281 yuan (\$486) per tonne on Tuesday, compared with a recent high of 3,335 yuan per tonne reached during night trading on July 16.

Steel mills in several Chinese regions initiated a second round of price cuts of 50-55 yuan (\$7-8) for coke, a key steelmaking raw material, on Monday, after the first round of price cuts was implemented last week.

Fastmarkets' weekly price assessment for steel plate domestic, ex-whs Eastern China, was 3,400-3,410 yuan (\$503-505) per tonne on Friday July 24, down by 20-30 yuan per tonne from 3,420-3,440 yuan per tonne a week earlier.

The latest assessment came in at 3,405 yuan per tonne at the midpoint, down by 150 yuan per tonne from this year's peak of 3,555 yuan per tonne reached on May 15.

The decline in plate prices was relatively limited, compared with losses in the HRC market, likely due to more resilient demand for plate and production curbs at some loss-making mills, sources said.

Fastmarkets' daily price assessment for steel hot-rolled coil domestic, ex-whs Eastern China, was at 3,315 yuan (\$491) per tonne at the midpoint on Tuesday, down by 205 yuan per tonne from the recent high of 3,520 yuan per tonne reached on May 11.

Steel plate news

US domestic plate prices stable as stock levels shrink, supply tightens further

By Melissa VanDervort - Tuesday 28 July

US steel plate prices were steady week on week on Tuesday July 28, with sources describing a continued high demand environment, with significant supply shortages and depleted buyer inventories pushing lead times out into the late fall and winter months.

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$70 per hundredweight (\$1,400 per short ton) on Tuesday July 28, steady week on week, and up by 1.45%, or \$1.00 per cwt, from \$69 per cwt on July 7.

Inputs were collected in a range of \$67.50-71.50 per cwt, representing offers and general indications of the spot market.

Spot scarcity and diminished inventory continue to plague the domestic plate market, with sustained high demand outpacing available supply, sources told Fastmarkets.

"Demand is still strong and lead times for plate are out to December," a buyer said. "The inventory in our yard is shrinking and as soon as we make a purchase most of it is sold."

Recent mill price increases have been readily accepted and absorbed, given robust demand, and market participants said they expect more increases to follow in the near term.

Nucor raised plate prices by \$60 per ton (\$3 per cwt) on **July 15**.

"It appears the \$60 per ton [increase] has been accepted, and I expect the trend on plate to continue as supply seems tight," a distributor said.

"The plate market remains strong and [there has been] no pushback on the price increases," a second distributor said.

Supply constraints are projected to worsen in the fall with multiple planned maintenance outages likely to further affect availability.

"Demand is good. Plate mills [are] doing a good job of controlling order intake and output. Deliveries are late [and that is] causing issues, but [it is] par for the course nowadays," a third distributor said. "Supply looks to further tighten [in] late Q3 [third quarter and] early Q4 [fourth quarter] due to maintenance shutdowns. [I] can only imagine further price increases."

Steelmaker Nucor discussed the substantial, prolonged demand for plate products during its second-quarter earnings call on **July 28**.

Top executives reported record quarterly plate shipments at its Brandenburg, Kentucky, plate facility.

"I want to recognize our team at Brandenburg, which shipped more than 230,000 tons this quarter, leading to another quarterly shipment record in plate," Nucor chairman and chief executive officer Leon Topalian said.

Nucor also has plate mills in Hertford County, North Carolina, and Tuscaloosa, Alabama. The three plate mills have a combined capacity of around 3.5 million tons per year of cut-to-length and discrete plate.

Looking ahead to the second half of 2026, Nucor executives were optimistic that the domestic plate market would continue on its high-demand trajectory.

"In plate, demand remains healthy across many important end markets while imports have fallen significantly," said Stephen Laxton, Nucor's president and chief operating officer. "That backdrop, combined with our expanded plate capabilities, positions us well heading into the second half of the year."

Lead times in the market have extended significantly and were reported in a wide range of approximately eight to 14 weeks.

undisclosed.

"Mills appear to be taking it slowly this week; they do not seem as eager as they were last week," a Turkish trader said. "We have heard of 15-16 cargoes, and there may be another five or six that have not been disclosed. So, they may have bought around 21-22 cargoes in July."

Another trading source said mills had deliberately slowed their scrap imports after last week's stronger buying activity. "Mills have slowed their scrap

purchases this week. The rebar market showed some signs of recovery last week, but that side is also quiet this week," the source said.

A third Turkish source said mills were less active in the deep-sea scrap market than they had been last week. "I think they do not want prices to rise any further," the source said.
