Chinese HRC exports to Korea are managed through a **quota system**, with no additional anti-dumping duties applied in exchange for price and volume commitments.

Market participants said the coated and cold-rolled case, filed just two months after provisional HRC duties took effect, suggested that Korean producers moved quickly to ensure the downstream segments did not remain exposed while the upstream case was being resolved.

HRC is the substrate from which both coated and cold-rolled products are made, and the product categories now under investigation are precisely where that material ends up.

A Seoul-based trader said the market had already adjusted ahead of any formal ruling. "There is no longer any China-origin CRC or hot-dipped galvanized being traded at spot in the Korean market. That tells you how fast things moved."

AGSI also has installed capacity of 720,000 tonnes per year of billet and 240,000 tonnes per year of sections, placing it among the region's larger recyclers of locally sourced scrap.

The steel producer's recent initiatives come as low-carbon steel draws interest globally, partly driven by the introduction of the EU Carbon Border Adjustment Mechanism (CBAM), which entered its definitive phase on January 1, 2026.

CBAM is an EU climate policy designed to reduce carbon leakage and support fair competition for European industries.

While the policy does not apply directly to countries in the Middle East and North Africa (MENA) region, **market participants expect it to strengthen the competitive position of steelmakers** with lower emissions footprints.

Steel production accounts for around 8% of global CO2 emissions, according to official data. But the steel industry in the Middle East is already almost fully reliant on electric-arc furnace-based routes, given it is comparatively recent, meaning the level of carbon emissions in the region is by default lower than in most of the rest of the world.

However, firm domestic demand in the region could limit the volumes available for export, according to market sources.

Challenging market conditions in the UAE

Trade activity through the Strait of Hormuz, a key shipping route for steel shipments from Asia, has been mostly limited following escalations in the region, affecting large parts of the Gulf steel markets.

Most imports into the UAE's Jebel Ali port were also restricted amid disruptions to shipping routes. This has contributed to higher billet import prices into the UAE, increasing cost pressure on re-rollers in the country and supporting higher local and imported rebar prices.

Fastmarkets' weekly price assessment for **steel billet import, cpt Jebel Ali, UAE** was \$570-580 per tonne on Tuesday April 28, narrowing upward from \$550-580 per tonne a week earlier.

The blockade of the Strait of Hormuz has constrained raw materials deliveries across parts of the Middle East, prompting some steel producers to reduce output, according to market sources.

Iran's limited steel production and export activity during this period has further tightened global supply of semi-finished products such as steel billet and slab.

AGSI, one of the major re-rollers in the UAE, said the **current situation was among the most challenging the market had faced**, adding that conditions could remain difficult into the second quarter of 2026.

Fastmarkets' weekly price assessment for **steel reinforcing bar (rebar) domestic, exw UAE** was 2,675-2,700 dirhams per tonne on April 28, narrowing upward from 2,650-2,700 dirhams per tonne a week earlier.

Himanshi Chaudhary in London contributed to this article.
