Steel plate news

US domestic plate prices rise amid significant spot supply shortage

By Melissa VanDervort - Tuesday 29 September

US steel plate prices increased on Tuesday September 29, 2026, with market participants describing a consistently high demand environment compounded by a substantial shortage of spot material.

Fastmarkets' weekly assessment for **steel cut-to-length plate carbon grade, fob mill US** was \$74.50 per hundredweight (\$1,490 per short ton) on Tuesday September 29, 2026, up by 0.68% from \$74 per cwt on September 22.

Inputs were collected in a range of \$69.50-75.50 per cwt, representing offers and indications of the general spot market.

Spot material remains in short supply amid consistently strong demand levels heading into the fourth quarter of 2026, sources told Fastmarkets.

"Right now, it's the same old, same old song and dance—high demand, decent prices, low stock [levels]," a distributor said.

A second distributor made a similar observation, saying, "Things are very tight with plate and will continue through 2027, and lead times are way out."

A buyer said spot supply levels are at historic lows in the domestic plate market.

"Spot levels are the lowest I have seen them in 30 years in the business. If people could buy more tons, they would be buying them. This shortage is not caused by a single issue," the buyer said. "The domestic mills are all running at capacity. Demand from established plate consumers is strong and increasing. Imports are limited and expensive. New demand sources are also coming online from data centers to shipbuilding to power generation to pipelines, with strong growth already visible for the next several years. [When you] throw in outages in the next few months, buyers are going to have a stressful fourth quarter."

Mill price increases are expected to be announced in the near term, with many mills having filled order books for the remainder of the year and currently taking orders for early 2027, according to a third distributor.

"[We are] hearing [some plate mills] will raise plate prices [by] \$40-60 per [short] ton for November, then break in December and regroup on prices for January 2027," the third distributor said. "Plate mills have 2027 project tons on the books today, [and it] looks like first half of 2027 will be very strong. [Some other mills] are full for [the] balance of 2026 and not quoting 2027 yet."

Lead times were reported at eight to 12 weeks.

Rebar news

Saudi Arabian rebar prices increase

By Serife Durmus - Tuesday 29 September

Rebar producers in Saudi Arabia increased their prices for orders to be placed in October, sources told Fastmarkets on Tuesday September 29.

The country's major mill was offering product at 2,900 riyals (\$761) per tonne delivered, rising from the previous price of 2,800 riyals per tonne delivered, which was stable since early July.

Tier 3 rebar producers were offering rebar at 2,600 riyals (\$682) per tonne delivered, and offers from tier 2 mills were around 2,850 riyals per tonne delivered.

Fastmarkets' weekly price assessment for **steel reinforcing bar (rebar), domestic, delivered Saudi Arabia** was 2,550-2,800 riyals per tonne on Monday September 28, unchanged week-on-week.

The price will be updated on Monday October 5.

UAE rebar flat amid sluggish demand; import billet narrows downward

By Hristo Rimpopov - Tuesday 29 September

UAE rebar prices held steady in the week to Tuesday September 29 amid sluggish demand, while import billet prices edged down at the top end as security concerns continued to disrupt import trade, sources told Fastmarkets.

Domestic rebar

In the previous week the country's biggest producer had rolled over its offer price for rebar at 2,921 dirhams (\$795) per tonne ex-works for orders to be received in September, unchanged since late June. Deals were heard at 2,860-2,875 dirhams per tonne ex-works.

This week a local mill lowered its offer for rebar by 20 dirhams to 2,825 dirhams per tonne ex-works.

Three market participants indicated that rebar was available at 2,820 dirhams per tonne ex-works.

One trader highlighted growing competitive pressure from Chinese-origin material entering the domestic sector.

"Chinese rebar is coming into the UAE market. It is very cheap compared to local and GCC mills, and mostly sold directly to projects," the source said, pointing to a major airport expansion receiving approximately 70,000 tonnes of material in September alone.

Looking ahead, market participants voiced concern that escalating logistics and security tensions around the Strait of Hormuz could disrupt supplies of iron ore pellets, direct-reduced iron (DRI) and hot-briquetted iron (HBI) to domestic electric-arc furnace (EAF) mills. However, doubts remain over whether mills can pass on rising production costs.

"It depends on supply and demand. We have to wait and see if developers are able to absorb high-cost construction materials when the real estate market is slow and they have to sell units at lower prices," a trader said.

Fastmarkets' weekly price assessment for **steel reinforcing bar (rebar), domestic, exw UAE** was 2,820-2,875 dirhams per tonne on September 29, unchanged from the previous week.

Rebar imports

Demand for imported rebar remained limited in the country and market participants indicated workable prices would be at around \$770-780 per tonne CPT.

The region's biggest producer had not announced its new rebar price before the publication of this assessment. A source from the mill told Fastmarkets that the offer for October will be announced either on September 29 or 30.

No significant bookings were heard.

Fastmarkets' weekly price assessment for **steel reinforcing bar (rebar), import, cpt Jebel Ali, UAE** was \$770-780 per tonne on September 29, unchanged week-on-week.

Billet imports

In the billet market, indications for material from within the Gulf Cooperation Council (GCC) region were heard in the range of \$640-655 per tonne cpt Jebel Ali.

Chinese-origin billet was indicated at \$590-595 per tonne CPT, although offers from Asia remained largely nominal and unworkable because of security risks and prohibitive delivery terms.

"Many traders aren't offering due to the escalations in both the Strait of Hormuz and the Bab el-Mandeb Strait," a trader told Fastmarkets earlier in September. "The exposure is very big and you don't know what will happen to the vessel when it approaches the destination - it might be hit by a missile or struck by a mine."

No major deals were heard.

Meanwhile, sellers were actively offering cargoes and fulfilling orders before the holiday. Market participants noted that traders preferred to lower inventory levels given the uncertainty surrounding post-holiday market conditions.

"Sellers are not confident about the price direction after the holiday, so they are willing to move material and reduce stock before the break," another trader based in Shanghai said.

The combination of stronger replenishment demand and active inventory liquidation kept market liquidity healthy and allowed rebar prices to remain largely unchanged.

Fastmarkets' daily price assessment for **steel reinforcing bar (rebar), domestic, ex-whs Eastern China**, was 3,130-3,150 yuan (\$466-469) per tonne on Tuesday, unchanged since September 22.

Billet

Fastmarkets' daily price assessment for **steel billet, domestic, exw Tangshan, Northern China**, was 2,980 yuan per tonne on Tuesday, down by 10 yuan per tonne from 2,990 yuan per tonne on Monday.

Shanghai Futures Exchange

The most-traded January rebar contract on the Shanghai Futures Exchange (SHFE) closed at 3,105 yuan per tonne on Tuesday, down by 1 yuan per tonne from 3,106 yuan per tonne on Monday.

Steel sections, beams news

Metallus lands 5-year contract worth up to \$995 million for defense steel supply

By Robert England - Tuesday 29 September

US specialty steel producer Metallus has been awarded an indefinite delivery/indefinite quantity contract by the US Defense Logistics Agency (DLA) with a maximum ceiling value of \$995 million to supply steel for critical defense applications, the company said on Tuesday September 29.

The contract has a five-year ordering period and allows the DLA to purchase material through delivery orders issued during the term. Metallus noted that the \$995 million ceiling represents the maximum amount that may be ordered and does not constitute a commitment by the agency to purchase that volume of material.

The company also received an initial delivery order valued at approximately \$125 million on September 29. Metallus said it has up to 24 months to fulfill each delivery order issued under the contract.

The initial order of \$125 million is just over 10% of Metallus' 2025 revenue of \$1.2 billion, while the contract's \$995 million ceiling approaches 83% of the company's 2025 sales, underscoring the potential size of the defense opportunity, although the ceiling value is not a guaranteed purchase commitment.

According to the Metallus, the contract covers specialty steel produced entirely in the United States and will support the DLA's mission to supply materials for military readiness.

"This award, along with the initial delivery order, represents another key step in the continued transformation of Metallus," Chief Executive Officer Mike Williams said.

"Our momentum within the defense market reflects Metallus' proven ability to produce specialty steel products that meet the rigorous performance, quality and traceability requirements of critical defense applications," Williams added.

Jenna Johnson, senior manager, finance and investor relations, confirmed in an email to Fastmarkets on Tuesday that the 5-year contract is for "high-quality bar-based products used in munitions."

Metallus has previously said publicly it supplies specialty steel, seamless tubing and bar products for artillery shells, mortar rounds, missile systems and other aerospace and defense applications.
